

INTRODUCTION TO INSTALL A VIRTUAL MACHINE

Virtualization does not fully support graphics intensive programs. You may or may not be able to play games or run certain programs using a virtual machine.

Step 1: In your system open Chrome or any browser and search Oracle virtual box download.

Step 2: Open the first shown website and go to the download options which was shown at the left side.

Step 3: The download the virtual box 7.0.10 by selecting the host based on your own system OS.

Step 4: It starts downloading. After the download is completed open the file.

Step 5: Click on the virtual box to install. A welcome page appears to virtual box 7.0.10 setup.

Step 6: Follow the ~~last~~ below commands for installation.

Read all the properties and click reset →

Step 7:- A custom set up page appears select windows application and click Next →

Step 8: A warning network interfaces has been displayed. Just click yes. The next page missing dependencies python. have been shown click ~~yes~~ yes for further installation.

Step 9: In order to install click Install. The Oracle VM Virtual Box 7.0.10 will be installed. Click finish for final setup ok yes.

Step 10: Now after installation. click on Oracle VM Virtual Box 7.0.10 which was displayed ~~to~~ in desktop.

Step 11: Now select new for setting the given guest OS over the windows OS.

Step 12: Install the Guest OS that you needed, and click Next.

Step 13: Select the hardware storage capacity for Guest OS and click Next.

Step 14: It displays a summary which shows configuration of the installed Guest OS.

Thus the installation of Guest OS over the windows OS using Virtual Box is successful.
